8. (currently amended) A process for the production of ~~*ortho*-aminophenols~~ an *ortho*-aminophenol from ~~nitroarenes~~ a nitroarene of the formula

wherein R is selected from the group consisting of -H, -OH, -COOH, -C_nH_{2n+1}, -C₆H₅, -X, -CX₃, -CHO, -OC_nH_{2n+1}, and -O-C₆H₅, wherein n ranges from 1 to 6, and X is F, Cl, Br or I, which comprises transforming said nitroarene to the corresponding hydroxylaminoarene with a metal catalyst and transforming said hydroxylaminoarene to said *ortho*-aminophenol using a biocatalyst consisting essentially of a mutase enzyme that converts said hydroxylaminoarene to said *ortho*-aminophenol, and recovering a fraction containing said *ortho*-aminophenol.

9. (original) The process of claim 8 wherein said metal is zinc.
